Trans. of Zhurnal Fizicheskoi Khimii (USSR) 1959,  
 v. 33, no. 11, p. 2117-2126.

DISCRIPTORS: \*Association, \*Ionization, \*Acid-base  
 equilibrium, \*Chemical equilibrium, \*Acids, Chemical  
 properties, Physical properties, Solvents, Mathe-  
 matical analysis, Quantitative analysis, Solvents,  
 Equations.

On the basis of a new theory of acid dissociation, an  
 equation was worked out which characterizes the ac-  
 tivity coefficient of the physical and chemical  
 properties of the solvents. The derived equation makes  
 it possible, on the basis of independent data, to evaluate  
 (Chemistry-Physical, TT, v. 10, no. 11) (over)

THE KINETICS OF THE DECOMPOSITION OF POTASSIUM BICARBONATE (Kinetika Razlozheniya Bikarbonata Kaliya) Jan 61 [12]n. 18 refs. RTS 1738.  
Order from I.C. or S.L.A. m\$2.40. ph\$3.30 61-15386

Trans. of Zhurnal Khimicheskoy Khimii (USSR) 1955,  
v. 29, no. 7, p. 1173-1180.

The kinetics of decomposition of potassium bicarbonate in the temperature range 158-214°C have been studied. The rate of the decomposition increases to a maximum and then diminishes to zero. The reaction commences at separate centres, then rapidly spreads over the surface, covering it with solid product in 5-10 min. Increasing the geometrical surface more than 50 times has practically no effect on the reaction rate; this is related to the large internal surface of the crystals. The activation energy of the decomposition of potassium bicarbonate is 15500 cal, which coincides, within the limits of experimental error (Chemistry-Physical, TT, v. 5, no. 7) (over)
